

**SPECIFICATION AMENDMENTS:**

Please amend the specification as follows:

Please replace the previously amended paragraph on page 6, lines 10-18 with the following paragraph:

In the embodiment shown, the outer peripheral edge 11a of the flange 11 is corrugated when seen in the ~~horizontal~~ vertical direction. In this case, the difference d between the top and the bottom of the corrugated shape (waveform) is not more than 0.5 mm. Further, the pitch p (the distance between the tops or bottoms) of the corrugated shape (waveform) is about 1mm.

Please replace the paragraph on page 9, lines 8-12 with the following paragraph:

In the case of this embodiment, the outer peripheral edge 11a of the flange 11 is also not straight but corrugated, so that the sharpness with respect to user's hand and finger and a packaging film can be reduced. The difference d between the top and the bottom of the corrugated shape (waveform) is not more than 0.5 mm. Further, the pitch p (the distance between the tops or bottoms) of the corrugated shape (waveform) is about 1mm.
